Magnet Graduate Feedback

"I want to sincerely thank you for the opportunity to complete the magnet internship and research project. The internship was the highlight of my high school career. The reason I wrote this email though is the research paper. I have been working on my first college lab report, and it is incredibly similar to our research paper. Having that in the background has made it easy. I know the statistics to use even when they only covered T-tests and one section really needed a regression analysis, and the research and writing skills have made it all a breeze to put together."
