Counselor F-Mc.....Colleen Garcia  
Counselor Md-S.....Katherine Barrington  
Counselor T-Z.....Senoria Cain

<b>Academic Elective</b>			
<b>Course Name/ Description</b>	<b>Course Number</b>	<b>Credit</b>	<b>Prerequisite</b>
<b><u>Oral Written Communication (Speech)</u></b> This course focuses on developing public speaking skills. The students will identify effective methods to arrange ideas and information in written form and then convert the written form into an effective oral delivery. The course focuses on critically thinking, organizing ideas, researching counter viewpoints, and communicating appropriately for different audiences and purposes. The students analyze professional speeches to enhance their knowledge of solid speech writing.	<b>23.0420011</b>	1.0	Must have successfully passes two (2) high school level English classes
<b><u>US &amp; World Affairs</u></b> U. S. & World Affairs is an in-depth examination of contemporary local, state, national, and international issues. The main purpose of this course is to assess and analyze social, political, and economic issues involved in current events, and American involvement in international events since World War II.	<b>45.0910099</b>	1.0	<b>11/12 Grade Only</b>
<b><u>Individual and the Law</u></b> Individual and the Law concentrates on constitutional and criminal law including the constitutional amendments, student constitutional rights (rights retained in school and those forfeited), and various aspects of criminal law. The course also reflects the vast topic of civil law including family law, rights in the workplace, housing, torts, consumer rights, and more. Students take appropriate law-related field trips, conduct a mock trial, and have a number of guest speakers who are directly involved in law including judges, attorneys, mediators, and probation officer.	<b>45.0560099</b>	1.0	<b>11/12 Grade Only</b>
<b><u>Sociology</u></b> Sociology is a study of human society and social behavior. The purpose of the course is to provide students with a basic understanding of how humanity is shaped largely by the groups to which people belong and by the social interaction that take place within those groups. Societal problems in the United States will also be discussed.	<b>45.0310099</b>	1.0	<b>11/12 Grade Only</b>
<b><u>Psychology</u></b> Psychology gives a general overview of the principles and concepts of psychology, including learning theory, perception, intellectual, and social development, abnormal behavior, and interpersonal relationships. The purpose of this course is to provide students with a better understanding of the dynamics	<b>45.0150099</b>	1.0	<b>11/12 Grade Only</b>

that shape our own behaviors as well as the behaviors of others.			
<b><u>AP Psychology</u></b> AP Psychology is a college level survey course with study in Learning Theory, Abnormal Behavior, and Social Psychology. Extensive reading, writing and statistical analysis are required by students.	<b>45.0160095</b>	1.0	<b>11/12 Grade Only</b>
<b><u>Scientific Research II</u></b> Research II course will develop projects based on their interests. These projects may be related to topics that they are covering in any of their science courses or could expand on those ideas. It is expected that the students will receive some support from their teachers but they will be working mostly independently. Projects at this level could be completed on a time frame of weeks to months. Presentations of the projects developed at this level will take place at regional or state science fair competitions for example.	<b>40.0922003</b>	1.0	<b>10 &amp; 11 Grade Magnet Only</b>
<b><u>Scientific Research III</u></b> Research III course will develop projects based on their interests. Projects at this level would be original in nature and will investigate students' ideas to solve a particular problem. It is expected that the students will work with someone outside the school setting as they work towards the solution of their problem. This type of projects may take the whole length of the course to be completed. Students' completing these projects is expected to present their solutions to the appropriate interests groups (i.e. a particular company, an interest group, etc.) or on settings like the Best Robotics competitions, Siemens, the High School Engineering Competition, etc.	<b>40.0923003</b>	1.0	<b>10 &amp; 11 Grade Magnet Only</b>

<b>CTAE</b>			
<b>Course Name/ Description</b>	<b>Course Number</b>	<b>Credit</b>	<b>Prerequisite</b>
<b><u>Intro to Business &amp; Technology</u></b> Introduction to Business & Technology is the foundational course for Advanced Accounting, Business Accounting, and Financial Services pathways. The course is designed for high school students as a gateway to the career pathways above and provides an overview of business and technology skills required for today's business environment. Knowledge of business principles, the impact of financial decisions, and technology	<b>07.4413099</b>	1.0	N/A

proficiencies demanded by business combine to establish the elements of this course. Emphasis is placed on developing proficient fundamental computer skills required for all career pathways. Students will learn essentials for working in a business environment, managing a business, and owning a business.			
<b><u>Financial Literacy</u></b> Step into this course specifically designed for high school students to understand the importance of the financial world, including planning and managing money wisely. Areas of study taught through application in personal finance include sources of income, budgeting, banking, consumer credit, credit laws and rights, personal bankruptcy, insurance, spending, taxes, investment strategies, savings accounts, mutual funds and the stock market, buying a vehicle, and living independently. Based on the hands-on skills and knowledge applied in this course, students will develop financial goals, and create realistic and measurable objectives to be MONEY SMART! Through project-based learning activities and tasks, students will apply mathematical concepts in realistic scenarios and will actively engage by applying the mathematics necessary to make informed decisions related to personal finance. Financial Literacy places great emphasis on problem solving, reasoning, representing, connecting, and communicating financial data.	<b>07.4260099</b>	1.0	Intro to Business & Technology
<b><u>Principles of Accounting</u></b> Principles of Accounting 1 is a skill-level course that is of value to all students pursuing a strong background in business, marketing, and management. Using financial information, students will learn how to make decisions about planning, organizing, and allocating resources using accounting procedures. Performing accounting activities for sole proprietorships and corporations following Generally-Accepted Accounting Procedures are included in the course. Students analyze business transactions and financial statements, perform payroll, and evaluate the effects of transactions on the economic health of a business.	<b>07.4110099</b>	1.0	Financial Literacy

<b><u>Marketing Principles</u></b> Marketing Principles is the foundational course for the Marketing and Management, Fashion Merchandising and Buying, and Marketing Communications and Promotion Pathways. Marketing Principles addresses all the ways in which marketing satisfies consumer and business needs and wants for products and services. Students develop a basic understanding of Employability, Foundational and Business Administration skills, Economics, Entrepreneurship, Financial Analysis, Human Resources Management, Information Management, Marketing, Operations, Professional Development, Strategic Management, and Global Marketing strategies. Instructional projects with real businesses, work-based learning activities including School-Based Enterprises, and DECA application experiences should be incorporated in this course.	<b>08.4740099</b>	1.0	N/A
<b><u>Intro to Sports &amp; Entertainment Marketing</u></b> This course introduces the student to the major segments of the Sports and Entertainment Industry and the social and economic impact the industry has on the local, state, national, and global economies. The products and services offered to consumers and the impact of marketing on these products and services are examined. Units include: Business Fundamentals, Product Mix, Product Knowledge, Product/Service Management, Business Regulations, Interpersonal Skill, Selling, Marketing Information Management, Economics, Distribution, Pricing, Advertising, Publicity/Public Relations, Sales Promotion, Business Risks, and Organization.	<b>08.4780099</b>	1.0	Marketing Principles
<b><u>Advanced Sports &amp; Entertainment Marketing</u></b> This course provides students opportunities to develop managerial and analytical skills and deepen their knowledge in sports/entertainment marketing. Topical units include: Marketing-Information Management, Selling, Publicity/Public Relations, Sales Promotion, Management of Promotion, Product Mix, Pricing, Positioning, and Marketing Planning.	<b>08.4850099</b>	1.0	Intro to Sports & Entertainment Management
<b><u>Intro to Digital Tech</u></b> Introduction to Digital Technology is the foundational course for Web & Digital Communications, Programming, Advanced	<b>11.4150099</b>	1.0	N/A

Programming, Information Support & Services, and Network Systems pathways. This course is designed for high school students to understand, communicate, and adapt to a digital world as it impacts their personal life, society, and the business world. Exposure to foundational knowledge in hardware, software, programming, web design, IT support, and networks are all taught in a computer lab with hands-on activities and project-focused tasks. Students will not only understand the concepts, but apply their knowledge to situations and defend their actions/decisions/choices through the knowledge and skills acquired in this course.			
<b><u>Information Tech Essentials</u></b> Can you fix it? What is wrong with it? Students taking this course will develop a skill set to solve computer problems, perform preventive maintenance, and explain functions of purposes of computer elements. Existing in a world full of computer technology, students will gain practical experience in assembling a computer system, installing an operating system, troubleshooting computers and peripherals, and using system tools and diagnostic software.	<b>11.4140099</b>	1.0	Intro to Digital Tech
<b><u>Information Tech Support</u></b> How do you make the device work? Students will apply Information Technology Essentials skills to diagnose and correct computer problems. By building knowledge and skill, students will install, build, upgrade, repair, configure, troubleshoot, and perform preventative maintenance on computer hardware, operating systems, laptops and portable devices. Practical and hands-on experience of troubleshooting and maintenance will allow students to demonstrate mastery of skills.	<b>11.4200099</b>	1.0	Information Tech Essentials
<b><u>Digital Design</u></b> Using web design as the platform for product design and presentation, students will create and learn digital media applications using elements of text, graphics, animation, sound, video and digital imaging for various format. The digital media and interactive media projects developed and published showcase the student skills and ability. Emphasis will be placed on effective use of tools for interactive multimedia production including storyboarding, visual development, project management, digital	<b>11.4510099</b>	1.0	Intro to Digital Tech

citizenship, and web processes. Students will create and design web sites that incorporate digital media elements to enhance content of web site.			
<b><u>Web Design</u></b> Can you think of any company that does not have a web presence? Taking this course will equip students with the ability to plan, design, and create a web site. Students will move past learning how to write code and progress to designing a professional looking web site using graphical authoring tools that contains multimedia elements. Working individually and in teams, students will learn to work with web page layout and graphical elements to create a professional looking web site.	<b>11.4520099</b>	1.0	Digital Design
<b><u>Computer Science Principles</u></b> Computer Science (CS) Principles is an intellectually rich and engaging course that is focused on building a solid understanding and foundation in computer science. This course emphasizes the content, practices, thinking and skills central to the discipline of computer science. Through both its content and pedagogy, this course aims to appeal to a broad audience. The focus of this course will fall into these computational thinking practices: connecting computing, developing computational artifacts, abstracting, analyzing problems and artifacts, communicating, and collaborating. Course meets fourth science requirement by the Board of Regents. Course meets fourth science requirement by the Board of Regents; course meets fourth mathematics, or world language requirement; two computer science courses from the same pathway will satisfy two years of sequenced foreign language courses.	<b>11.4710099</b>	1.0	Intro to Digital Tech
<b><u>AP Computer Science Principles</u></b>	<b>11.0190099</b>	1.0	Intro to Digital Tech
<b><u>AP Computer Science A</u></b> AP Computer Science A is equivalent to a first-semester, college-level course in computer science. The course introduces students to computer science with fundamental topics that include problem solving, design strategies and methodologies, organization of data (data structures), approaches to processing data (algorithms), analysis of potential solutions, and the ethical and social implications of computing. The course emphasizes both object-	<b>11.0160099</b>	1.0	AP Computer Science Principles

oriented and imperative problem solving and design using Java language. These techniques represent proven approaches for developing solutions that can scale up from small, simple problems to large, complex problems. The AP Computer Science A course curriculum is compatible with many CS1 courses in colleges and universities. Course meets fourth science or fourth mathematics or world language requirement; two computer science courses from the same pathway will satisfy two years of sequenced foreign language courses.			
<b><u>Intro to Culinary Arts</u></b> Introduction to Culinary Arts is the foundational course designed to introduce students to fundamental food preparation terms, concepts, and methods in Culinary Arts where laboratory practice will parallel class work. Fundamental techniques, skills, and terminology are covered and mastered with an emphasis on basic kitchen and dining room safety, sanitation, equipment maintenance and operation procedures.	<b>20.5310099</b>	1.0	N/A
<b><u>Culinary Arts I</u></b> As the second course in the Culinary Arts Career Pathway, the prerequisite for this course is Introduction to Culinary Arts. Culinary Arts I is designed to create a complete foundation and understanding of Culinary Arts leading to postsecondary education or a food-service career. This fundamentals course begins to involve in-depth knowledge and hands-on skill mastery of culinary arts.	<b>20.5321099</b>	1.0	Intro to Culinary
<b><u>Culinary Arts II</u></b> As the third course in the Culinary Arts Pathway, the prerequisite for this course is Culinary Arts I. Culinary Arts II is an advanced and rigorous in-depth course designed for the student who is continuing in the Culinary Arts Pathway and wishes to continue their education at the postsecondary level or enter the food-service industry as a proficient and well-rounded individual. Strong importance is given to refining hands-on production of the classic fundamentals in the commercial kitchen.	<b>20.5331099</b>	1.0	Culinary I

<b><u>Ind. Fund Occupational Safety</u></b> This course is designed as the foundational course in the Carpentry, Plumbing, Electrical, Masonry, Machining, Welding, Sheet Metal, Heating, Ventilation, Air Conditioning and Refrigeration, and HVACR Electrical pathways to prepare students for pursuit of any career in construction.	<b>46.5450099</b>	1.0	N/A
<b><u>Intro to Construction</u></b> This course is preceded by the Occupational Safety and Fundamentals course. This course offers an opportunity for students to build on their knowledge and skills developed in Occupational Safety. It introduces them to four construction craft areas and is also the second step towards gaining a Level One Industry Certification in one of the craft areas. The goal of this course is to introduce students to the history and traditions of the carpentry, masonry, plumbing, and electrical craft trades. Students will explore how the various crafts have influenced and been influenced by history. The student will also learn and apply knowledge of the care and safe use of hand and power tools as related to each trade. In addition, students will be introduced to, and develop skills to differentiate between blueprints, as is related to each individual craft area.	<b>46.5460099</b>	1.0	IFOS
<b><u>Carpentry</u></b> This course is preceded by Introduction to Construction. This course is the third of four courses that provides the student a solid foundation in carpentry skills and knowledge. It is the third step in gaining a Level One Industry Certification in Carpentry. This course provides an overview of the building materials used in the carpentry craft. It teaches techniques for reading and using blueprints and specifications especially as related to the carpentry craft. It provides specific knowledge and skills in site layout and floor and wall framing systems. It includes the basic industry terminology for a carpentry craftsman.	<b>46.5500099</b>	1.0	Intro to Construction
<b><u>Intro to Drafting &amp; Design</u></b> Introduction to Drafting and Design is the foundational course for the Architectural Drafting and Design pathway. Emphasis is placed on safety, geometric construction, fundamentals of computer-aided drafting, and multi-view drawings. Students learn drafting techniques through the study of	<b>48.5410099</b>	1.0	N/A

geometric construction at which time they are introduced to computer-aided drafting and design. The standards are aligned with the national standards of the American Design Drafting Association (ADDA).			
<b><u>Survey of Engineering Drawing</u></b> Survey of Engineering Drawing is the second course in the Engineering Drafting and Design Career Pathway. The course is designed to build student skills and knowledge in the field of engineering graphics/technical drafting. The course focus includes employability skills, career opportunities, applied math, working drawings that include sectional, auxiliary, detail and pictorial views, and pattern developments. In addition, elements in applied mathematics are integrated throughout the course.	<b>48.5420099</b>	1.0	Intro to Engineering & Drawing
<b><u>3-D Modeling and Analysis</u></b> Three-Dimensional (3D) Modeling and Analysis is a one-credit course that completes the pathway in Engineering Drafting and Design. Reverse engineering strategies are recommended for third level working drawings. Computer-aided design (CAD) is recommended for use extensively with each standard in the course. Focus is on employability strategies, career studies, applied math, fasteners, working drawings, and assembly drawings.	<b>48.5430099</b>	1.0	Survey of Engineering Graphics
<b><u>Architectural Drawing/Design</u></b> Architectural Drawing and Design I is the second course in the Architectural Drawing and Design pathway and introduces students to the basic terminology, concepts, and principles of architectural design. Emphasis is placed on house designs, floor plans, roof designs, elevations (interior and exterior), schedules, and foundations. The standards are aligned with the drafting and design standards in Georgia's technical colleges, thus helping students qualify for advanced placement to continue their education at the postsecondary level.	<b>48.5450099</b>	1.0	3-D Modeling and Analysis
<b><u>Intro to Graphics &amp; Design</u></b> This course is designed as the foundational course for both the Graphics Production and Graphics Design pathways. The Graphics and Design course provides students with the processes involved in the	<b>48.5610099</b>	1.0	N/A

technologies of printing, publishing, packaging, electronic imaging, and their allied industries. In addition, the Graphics and Design course offers a range of cognitive skills, aesthetics, and crafts that includes typography, visual arts, and page layout.			
<b><u>Graphic Design &amp; Production</u></b> As the second course in the Graphics Communication and Graphics Design Pathways, this course builds on knowledge and skills learned in the Introduction to Graphics and Design course and focuses on procedures commonly used in the graphic communication and design industries. Students will gain more experience in creative problem solving and the practical implementation of those solutions across multiple areas of graphic design and graphic communications.	<b>48.5620099</b>	1.0	Intro to Graphics & Design
<b><u>Advanced Graphic Design</u></b> Students will continue to explore in an increasingly independent manner, the principles of design and layout procedures relating to the field of graphic design. Content will cover electronic systems and software programs used in graphic design, page composition, image conversion, and digital printing.	<b>48.5280099</b>	1.0	Graphic Design & Production
<b><u>Practicum A – Press Operations</u></b> This one credit course provides the student an opportunity to build on Press Operation Skills learned in the Introduction courses.	<b>48.5630099</b>	1.0	Advanced Graphic Design & Production
<b><u>Practicum B – Digital File Preparation</u></b> This one-credit course provides an opportunity for the student to build on skills learned in the introductory courses. Topics include: Digital File Preparation and Digital File Output.	<b>48.5640099</b>	1.0	Practicum A – Press Operations
<b><u>Practicum C – Binding &amp; Finishing</u></b> This one credit course is designed to provide the student an opportunity to specialize in Binding and Finishing in the Graphic Communications industry.	<b>48.5650099</b>	1.0	Practicum B – Digital File Preparation
<b><u>Audio &amp; Video Tech &amp; Film I</u></b> This course will serve as the foundational course in the Audio & Video Technology & Film pathway. The course prepares students for employment or entry	<b>10.5181099</b>	1.0	N/A

into a postsecondary education program in the audio and video technology career field. Topics covered may include, but are not limited to: terminology, safety, basic equipment, script writing, production teams, production and programming, lighting, recording and editing, studio production, and professional ethics. (NEW FY14			
<b><u>Audio &amp; Video Tech &amp; Film II</u></b> This one credit course is the second in a series to prepare for a career in Broadcast/Video production and/or to transfer to a postsecondary program for further study. Topics include: Planning, Writing, Directing and Editing a Production; Field Equipment Functions; Operational Set-Up and Maintenance; Advanced Editing Operations; Studio Productions; Performance; Audio/Video Control Systems; Production Graphics; Career Opportunities; and Professional Ethics.	<b>10.5191099</b>	1.0	AVTF I
<b><u>Audio &amp; Video Tech &amp; Film III</u></b> This one credit transition course is designed to facilitate student-led broadcasts/videos under the guidance of the instructor. Students work cooperatively and independently in all phases of broadcast/video production.	<b>10.5201099</b>	1.0	AVTF II
<b><u>Broadcast/Video Applications</u></b> BVP Applications designed to assist students in mastering skills necessary to gain entry level employment or to pursue a post-secondary degree or certificate. Topics include advanced camcorder techniques, audio production, scriptwriting, producing, directing, editing, employability skills, and development of a digital portfolio to include resume', references, and production samples. This course is laboratory based and allows the student to further develop skills and competencies learned in earlier courses. Emphasis is on performing at an independent level of proficiency and refine building a digital portfolio of his/her work for college entrance or industry placement. Topics of this laboratory based course include specialization selection, production, career portfolio, communication skills, and professional ethics. Production Research is an advanced course in broadcast producing and directing and is intended to provide great challenge and sense of accomplishment. The course is intended to prepare	<b>10.5141099</b>	1.0	AVTF III

the student to thoroughly design and successfully execute a series of advanced broadcasting productions. This course stimulates the student to explore the potentials of the medium and to discover those materials, instruments, and techniques that are unique to the broadcasting medium.			
<b>Broadcast/Video Production Lab</b> This course is laboratory based and allows the student to further develop skills and competencies learned in earlier courses. Emphasis is on performing at an independent level of proficiency and refine building a digital portfolio of his/her work for college entrance or industry placement. Topics of this laboratory based course include specialization selection, production, career portfolio, communication skills, and professional ethics.	<b>10.5151099</b>	1.0	BVA
<b>Broadcast/Video Production Management</b> This course is designed to allow students to experience the workplace through management opportunities. Throughout the management course, the student will gain interpersonal skills, demonstrate work ethics, and work with various broadcasting processes related to the field of broadcast/video production.	<b>10.5171099</b>	1.0	BVP Lab
<b>NJROTC</b> The purpose of this course is to help students understand the missions, goals, and opportunities available as members of the NJROTC program. This course will also introduce students to the basic principles of leadership, which combined with the many opportunities for practical experience in the NJROTC program will prepare them for leadership roles in school and upon graduation. Students will gain an understanding of our nation, our values, traditions, heritage, respect for our laws, as well as becoming involved, responsible citizens.  <b>(Level to be determined by instructor)</b>	<b>Yearlong Course</b> <b>28.0230099</b> <b>28.4240099</b>	1.0	N/A

Fine Arts			
Course Name/ Description	Course Number	Credit	Prerequisite
<b><u>Band</u></b> are band performance classes that focus on the fundamentals of tone, production, music reading and performance. <b>(Level to be determined by director)</b>	<b>53.0361099</b> <b>53.0361097</b>	1.0	N/A
<b><u>Chorus</u></b> provides opportunities for male and female students to develop performance skills in chorus singing. <b>(Level to be determined by director)</b>	<b>54.0211099</b> <b>54.0211097</b>	1.0	N/A
<b><u>Orchestra</u></b> provides opportunities for advanced-level performers to increase performance skills and precision on orchestral stringed instruments. <b>(Level to be determined by director)</b>	<b>53.0571099</b> <b>53.0571097</b>	1.0	N/A
<b><u>Theatre Arts/Fundamentals I</u></b> This course serves as prerequisite for other theatre/drama courses. Develops and applies performance skills through basic vocal, physical and emotional exercises; includes improvisation and scene study and related technical art forms.	<b>52.0210099</b>	1.0	N/A
<b><u>Fundamentals of Theatre II</u></b> This course enhances level one skills.	<b>52.0220099</b>	1.0	Fund. Theatre I
<b><u>Musical Theatre</u></b> Theatre Arts/Musical Theatre I introduces the style and characteristic elements of modern musical theatre. Covers production staging, orchestration, voice and dance; offers an opportunity for team teaching through interdisciplinary collaboration with the chorus, band, art, technology, physical education and dance instructors. Offers opportunity for performance.	<b>52.0310099</b>	1.0	Fund. of Theatre I & II
<b><u>Advanced Drama</u></b> Theatre Arts/Advanced Drama I introduces acting and theatre as disciplined art forms; covers methods to observe and understand human behavior and to use those observations to create a character. Includes basic techniques of stage movement and use of physical expression for communication.	<b>52.0510099</b>	1.0	Fund. of Theatre I & II

Enhances vocal technique and specific patterns for better verbal communication.			
<b><u>Technical Theatre</u></b> Theatre Arts/Technical Theatre I introduces technical considerations of play production; covers properties, lighting and settings, program, box office, marketing, management, make-up and costumes.	52.0410099	1.0	N/A
<b><u>Advanced Technical Theatre</u></b> Theatre Arts/Technical Theatre II enhances level-one skills and introduces aspects of drafting, creation of lighting, sound, properties, costumes and make-up design. Offers opportunities to apply skills in these areas.	52.0420099	1.0	Tech Theatre I
<b><u>Comprehensive Art</u></b> Visual Arts: Comprehensive introduces art history, criticism, aesthetics & studio production. It emphasizes the ability to understand & use the elements of art & principles of design through a variety of media processes and visual resources. <i>*This is the prerequisite course for all other studio art classes.</i>	50.0211099	1.0	N/A
<b><u>Ceramics I</u></b> Ceramics/Pottery I introduces the characteristics of clay and design using various techniques of construction and surface treatments. Studio processes are emphasized and students are involved in firing and presenting their clay work.	50.0411099	1.0	Comp. Art
<b><u>Ceramics II</u></b> Ceramics/Pottery II enhances skills learned in the level 1 course and provides additional opportunities for various clay techniques in hand building and wheel throwing. Evaluation and aesthetic judgment of student work is emphasized and personal expression in clay is encouraged.	50.0412099	1.0	Ceramics I
<b><u>Drawing &amp; Painting I</u></b> Drawing & Painting I introduces drawing and painting techniques and a variety of drawing and painting media. Emphasizes development of drawing and painting skills and utilizes problem solving skills to achieve desired results.	50.0313099	1.0	Comp. Art

<b><u>Drawing &amp; Painting II</u></b> Drawing & Painting II introduces advanced drawing and painting techniques and focuses on individual expression. Problem solving skills are challenged to achieve mastery of techniques and materials. Exhibition and presentation opportunities are provided.	<b>50.0314099</b>	1.0	Drawing & Painting I
<b><u>AP Studio Art Drawing</u></b> Advanced Placement Studio/Drawing conforms to College Board topics for the Advanced Placement Studio Art Drawing Portfolio Examination. Requires submission of original works and slides to be evaluated on quality, breadth and concentration of an idea or concept. Emphasizes experiences using different drawing media and approaches. This course provides students with college-level studio experiences and encourages self-expression.	<b>50.0811095</b>	1.0	Drawing & Painting II
<b><u>AP 2D Design</u></b> Advanced Placement Studio Art: 2-D Design conforms to College Board topics for the Advanced Placement Studio Art 2-D Design Portfolio Examination. Requires submission of original works and slides to be evaluated on quality, breadth and concentration of a concept or idea. Emphasizes experiences in 2-D Design art production which might include (but not limited to) photography, printmaking and computer-generated work. This course provides students with college-level studio experiences and encourages self-expression.	<b>50.0813095</b>	1.0	Ceramics II or Sculpture II
<b><u>AP 3D Design</u></b> Advanced Placement Studio/3-D Design conforms to College Board topics for the Advanced Placement Studio Art Drawing Portfolio Examination. Requires submission of original works and slides to be evaluated on quality, breadth and concentration of an idea or concept. Emphasizes experiences using different 3-D design, media and approaches. This course provides the students with college level studio experiences and encourages self-expression.	<b>50.0814095</b>	1.0	Ceramics II or Sculpture II

Physical Education			
Course Name/ Description	Course Number	Credit	Prerequisite
<b><u>Health</u></b>	<b>17.0110099</b>	0.5	N/A
<b><u>Personal Fitness</u></b> Personal Fitness (BPE) is designed to help students understand why exercise and fitness are important in developing a healthy and active lifestyle. The course will emphasize successful strategies for maintaining good cardiovascular endurance, flexibility, muscular strength, muscular endurance and body composition. It will follow a conceptual approach dealing with the following topics: the nature of fitness, assessing individual fitness, developing and maintaining a life-long fitness program, and developing an appreciation for efficient movement by viewing it as both an art and a science. Fitness progress and assessments will be made utilizing POLAR Heart Rate Monitor technology to determine cardiovascular fitness levels and their relation to the individuals target heart rate zone.	<b>36.0510098</b>	0.5	N/A
<b><u>Sports Medicine</u></b> Introduces techniques to prevent, recognize, evaluate, manage, treat, and rehabilitate athletic injuries.	<b>36.0150099</b>	1.0	N/A
<b><u>General PE</u></b> Focuses on any combination or variety of team sports, lifetime sports, track and field events, aquatics/water sports, outdoor education experiences, rhythmic/dance, recreational games, gymnastics, and self-defense. Provides basic methods to attain a healthy and active lifestyle.	<b>36.0110099</b>	1.0	N/A
<b><u>Team Sports</u></b> Introductory Team Sports is designed to introduce students to three different team sports, with no one sport less than 4 weeks or longer than 8 weeks. Those from which the selection is made include the following: basketball, gym hockey, soccer, speedball, flag football, ultimate Frisbee, team handball, softball, and volleyball. Others may be substituted depending upon facilities and equipment. This course will offer students the opportunity to learn the history, rules and regulations, etiquette, strategy	<b>36.0210099</b>	1.0	N/A

and judgment, and the basic motor skills of each selected activity.			
<b><u>Advanced Recreational Games</u></b> Advanced Recreational Games provides further development of skills and exploration into technical aspects of recreational games.	<b>36.0470099</b>	1.0	N/A
<b><u>Weight Training</u></b> Weight Training Weight Training is designed to introduce students to a weight-training program that will promote over-all body fitness. The student will be exposed to different types of weight equipment and methods of training with weights. The student will also gain knowledge of the different types of exercises, correct techniques of executing the various exercises, proper breathing, and the safety factors involved in spotting.	<b>36.0540099</b>	1.0	N/A
<b><u>Adv Weight Training (Athletes Only)</u></b> Advanced Weight Training increases strength and cardiovascular fitness through an individualized weight training program. Emphasizes self-management and adherence strategies.	<b>36.0640099</b>	1.0	Athletes Only
<b><u>Body Sculpting</u></b> Body Sculpting is designed to redefine the shape of the body through specific exercises in order to attain desired body image through weight training, conditioning exercises and proper nutrition.
